# Extension Overview

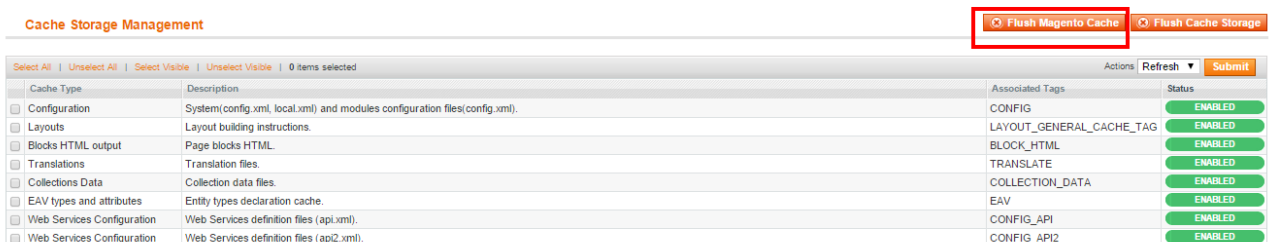

The Textlocal Magento Extension is a comprehensive and powerful extension that enables you to send personalized SMSs to your customers or administrators during various events in the Magento store.

## Features

1. SMS configuration confirmation is sent out to the desired numbers.
2. You can configure SMS notifications for both admin and customers.
3. Message will be sent out for the following status update:
  - a. When a new order is placed.
  - b. When an order is kept on hold.
  - c. When an order is released.
  - d. When an order is complete.
  - e. When an order is cancelled.
  - f. When an order is closed.
  - g. When an order is edited - Cancel of the previous order and new order placing message is sent.
  - h. On reordering.
  - i. On raising an invoice.
  - j. On shipment.
4. All the above message templates are customizable.

## Integration Process

1. Download and extract the **.zip file**
2. Follow the folder tree and copy the 'Textlocal' folder under **app->code->community**
3. Copy the Textlocal\_SMSNotifications.xml file under **app->etc->modules**
4. Login to your Magento admin account as an administrator.
  - a. In-case of no administrator account, create an admin role from **Systems->Permission->Roles**
5. Go to **Systems->Cache** Management, select all and click on 'Flush Magento Cache'

The screenshot shows the 'Cache Storage Management' interface in a Magento admin panel. At the top right, there are two buttons: 'Flush Magento Cache' (highlighted with a red box) and 'Flush Cache Storage'. Below the buttons is a table with columns for 'Cache Type', 'Description', 'Associated Tags', and 'Status'. The table lists various cache types, all of which are currently 'ENABLED'.

Cache Type	Description	Associated Tags	Status
<input type="checkbox"/> Configuration	System(config.xml, local.xml) and modules configuration files(config.xml).	CONFIG	ENABLED
<input type="checkbox"/> Layouts	Layout building instructions.	LAYOUT_GENERAL_CACHE_TAG	ENABLED
<input type="checkbox"/> Blocks HTML output	Page blocks HTML.	BLOCK_HTML	ENABLED
<input type="checkbox"/> Translations	Translation files.	TRANSLATE	ENABLED
<input type="checkbox"/> Collections Data	Collection data files.	COLLECTION_DATA	ENABLED
<input type="checkbox"/> EAV types and attributes	Entity types declaration cache.	EAV	ENABLED
<input type="checkbox"/> Web Services Configuration	Web Services definition files (api.xml).	CONFIG_API	ENABLED
<input type="checkbox"/> Web Services Configuration	Web Services definition files (api2.xml).	CONFIG_API2	ENABLED

6. Navigate to **Systems->Index Management**, select all and re-index all the modules.

Index Management

Index	Description	Mode	Status	Update Required	Updated At	Action	
<input type="checkbox"/>	Product Attributes	Index product attributes for layered navigation building	Update on Save	READY	NO	6 Apr 2015 13:36:43	<a href="#">Reindex Data</a>
<input type="checkbox"/>	Product Prices	Index product prices	Update on Save	READY	NO	6 Apr 2015 13:36:44	<a href="#">Reindex Data</a>
<input type="checkbox"/>	Catalog URL Rewrites	Index product and categories URL rewrites	Update on Save	READY	NO	27 Mar 2015 18:54:37	<a href="#">Reindex Data</a>
<input type="checkbox"/>	Category Products	Indexed category/products association	Update on Save	READY	NO	6 Apr 2015 13:36:44	<a href="#">Reindex Data</a>
<input type="checkbox"/>	Catalog Search Index	Rebuild Catalog product fulltext search index	Update on Save	READY	NO	6 Apr 2015 13:36:44	<a href="#">Reindex Data</a>
<input type="checkbox"/>	Stock Status	Index Product Stock Status	Update on Save	READY	NO	6 Apr 2015 13:36:43	<a href="#">Reindex Data</a>
<input type="checkbox"/>	Tag Aggregation Data	Rebuild Tag aggregation data	Update on Save	READY	NO	6 Apr 2015 13:36:44	<a href="#">Reindex Data</a>

7. Go to **System->Configurations**

8. In the left vertical menu, under services click on **SMS Notifications**

SMS Notifications Save Config

**API Credentials**

Api Key	<input type="text" value="DBdXXXXXXXXXX98l-jHZrrA9FUAEt32zPqfmm2"/>	[GLOBAL]
SENDERID	<input type="text" value="TXTLCL"/>	[GLOBAL]

**Order Notification Settings**

Primary Admin Number. You can specify multiple numbers separated by comma  [STORE VIEW]

To send an automatic notification by SMS once an order has been placed with your store , enter a placed message below.

Variable parameters : {{name}},{{amount}},{{order}}

Notification Order placed Status  [STORE VIEW]

To send an automatic notification by SMS once an order has been held with your store, enter a hold message below.

9. Configure your **API key** and **Sender ID**.

- API key can be viewed/created in Textlocal Messenger under **Settings->API Keys**
- If your account is **Promotional**, the sender ID needs to be added as **TXTLCL**. However the message will be delivered with a random 6 digit sender ID as per TRAI regulations.
- If your account is **Transactional**, please add your pre-approved sender ID
  - To know how to convert your account to Transactional, please refer our comprehensive [FAQs](#) or mail to [support@textlocal.in](mailto:support@textlocal.in)

10. Configure/Edit the templates for the events.

11. You can configure global placeholders like Order number, Name, Shipment number, Sale Value in the templates
